ART21STUDIO

Art21Studio was founded more than 26 years ago by Francisco Quiroz, with the purpose of providing a workshop and production space in a studio environment, for artists willing to experiment with polymer-based production materials and techniques. Art21Studio is now the production studio of choice for artists from 45 countries. The wide variety of polymer-based works and commissions produced in Art21Studio have been on display at art fairs worldwide. Edward Quiroz, Francisco's son, is the current studio manager, in charge of overseeing day-to-day operations. The sculptural creations in this exhibit were selected from a roster of artists who have produced their work at Art21Studio.
